## Medical Claims System Updated to Accept Health and Behavior Codes

From: Passport Health Plan  
Sent: October 10, 2016  
To: Passport Behavioral Health Providers

### **Background:**

Passport Health Plan (Passport) has updated the medical claims payment system to allow payment for **Health and Behavior Codes 96150 through 96155**, when these services are rendered by Behavioral Health Providers.

Health and Behavior Codes require the appropriate modifier that indicates the level of professional who provided the service. Claims submitted without the appropriate CPT/modifier combination will deny, *Invalid/Inappropriate/Deleted or Missing Procedure Code, Modifier, or Description*.

This communication is not intended to address services rendered with a behavioral health diagnoses.

### **Provider Action Needed:**

No action is required on denied claims with the appropriate CPT/modifier combination for dates of service beginning January 1, 2014, as these claims will be automatically reprocessed. All other claims with adjudication dates of 24 months or less will need to be resubmitted following the billing requirements above. Claims billed without the appropriate CPT/modifier combination must be resubmitted.

### **Questions:**

For any questions, please contact Provider Services, 800-578-0775 or your [provider relations specialist](#).
